OUR PURPOSE

Our goal is to maintain a reputation of excellence, the trust and satisfaction of our employees, customers and partners through our Core Values. To ensure the continuity of achieving profitable growth by working and investing in the field of Machinery, Power, Aftersales & Engine Parts, Service Operations, Aftermarket (Industrial & Filtration Products), and the Rental Operations space.

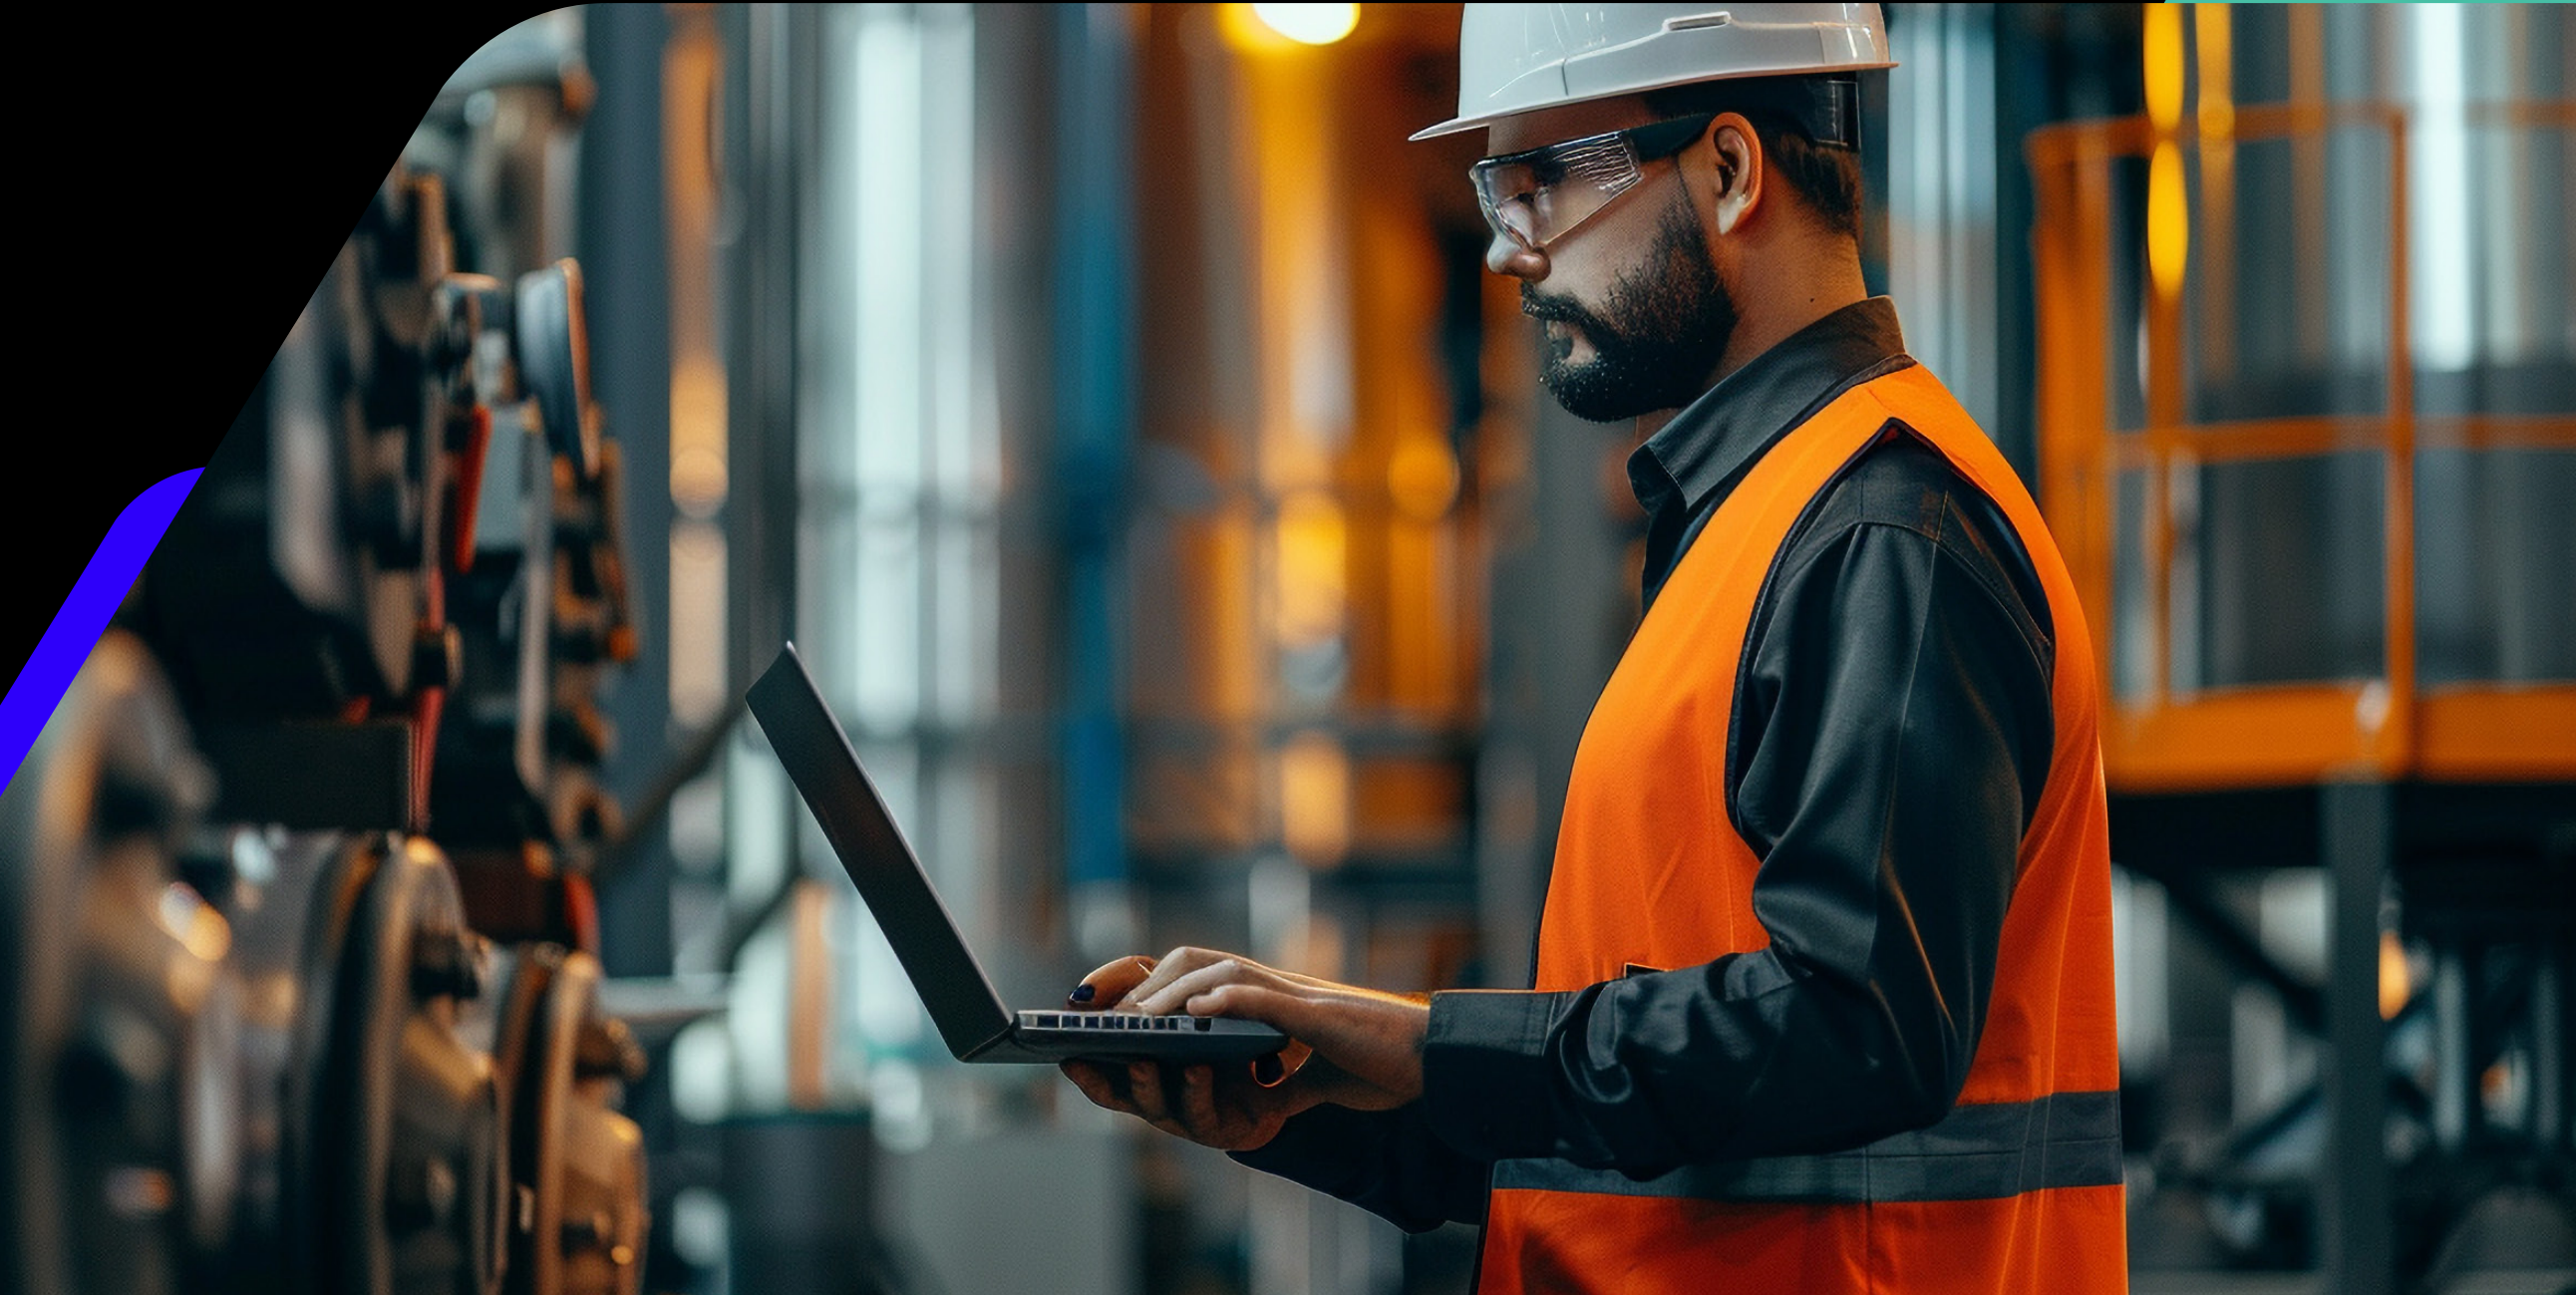

OUR VISION

To pursue a leadership position through diversification and growth in Saudi Arabia and beyond, while continuing to explore solutions to lead on the Power and Energy Space, and beyond - Covering and powering the whole value chain.

OUR MISSION

- Become an active player in the Kingdom's 2030 Vision and beyond
- Provide customers with bespoke solutions in multi sectors
- Become an employer of choice in the country and move towards becoming more of a corporate run organization (vs. a traditional family business)
- Invest in sustainable energy solutions in line with Saudi Green Initiative

OUR VALUES

We pride ourselves on upholding our 5 Core Values, which guides every decisions we make as we pursue our ambitions and drives our Competences

Working professionalism
and Integrity & Compliance

SUMMARY

Power isn't just what we provide; it's what we inspire. For nearly 50 years, Sawary has been the driving force behind Saudi Arabia's growth and innovation.

Since 1974, we've kept the Kingdom energized-powering homes, industries, and ambitions with unwavering commitment.

From bustling cities to remote shores, from thriving businesses to resilient naval fleets, Sawary delivers more than electricity; we deliver empowerment.

As your all-in-one partner for progress, we bring together a full suite of solutions:

cutting-edge generators, robust engines, reliable power systems, premium parts, filters, expert services, and advanced concrete equipment.

Amazing Power

At Sawary, every solution we provide is designed to drive your vision forward and fuel the future

OUR LOCATIONS

SAWARY HISTORY

In 1974, in the heart of Jeddah, a vision sparked in Sheikh Ahmed Al Sulaiman's mind—a vision of a thriving Saudi Arabia, alive with innovation, bustling cities, and industries powered by a reliable pulse of energy. From that spark, Sawary was born—not just a company, but a promise to illuminate homes, energize businesses, and unlock the untapped potential of the nation.

What began as a small endeavor in Jeddah quickly grew into a force that fueled progress across the Kingdom. Sawary didn't just power industries; it powered dreams. From laying the first cables to igniting factories and lighting up villages tucked away in the desert, every milestone marked a step toward a brighter future.

The journey was no ordinary one. Sawary's early days were built on resilience, creativity, and determination. With no maps or guides, the pioneers forged their path, solving technical challenges, earning trust, and building partnerships that transformed the landscape of energy in Saudi Arabia.

Every generator installed and every switch flipped was a testament to their mission: to make progress accessible to all.

MEMORY LANE

As the Kingdom grew, so did Sawary.

It became more than a provider of electricity-it became a partner in progress. Expanding its reach beyond borders, the company embraced global expertise, collaborated with innovators, and created a network of knowledge and solutions as intricate and enduring as Saudi's history.

Today, Sawary is a beacon of power and possibility.

It stands as a tribute to its visionary founder, the hard work of its trailblazers, and the trust of its customers and partners.

driving the Kingdom toward an even brighter tomorrow.

At Sawary, power isn't just about energy; it's about enabling ambition, sparking ideas, and shaping the future.

Established by
Sheikh Ahmed Bin Abdullah Al Sulaiman,
marking the beginning of a trusted name in
Saudi Arabia's power and industrial sector.

Began representing major
generator brands, including Onan
and Kohler, expanding our influence
in power solutions.

Expanded our offerings by representing
Baldwin Filters (Parker), adding filtration
solutions to our portfolio.

1974

1975

2000

Became the official representative
of Rolls-Royce MTU Engines and Gensets,
solidifying our position in the premium power
systems market.

Added Detroit Diesel Engines
to our growing list of partners, offering
high-performance engines to our clients.

2013

Began representing SIEL UPS,
strengthening our
uninterruptible power
solutions offering.

2014

2017

2021

Extended our partnership
with Parker
for products in KSA and
Yemen, enhancing our
filtration and motion
control capabilities.

Partnered with Therman
Industrial Process Heating,
adding advanced heating
solutions to our portfolio.

Added ItalTower Professional
Lighting Towers, offering robust
lighting solutions for industrial and
construction use.

Launched The RENTAL
Company, providing flexible
equipment rental solutions
for various sectors.

2024

2024

2024

Began representing AKSA Power
Generation, further expanding our
energy generation solutions.

2023

Introduced Costex Tractor Parts
(CTP®) to our offerings, providing
top-quality parts for the construc-
tion sector.

2023

Started representing KCP Concrete
Pumps, catering to the construction
and infrastructure industries.

2021

Partnered with Shell Lubricants to offer
premium lubrication solutions, ensuring
the efficiency of our equipment.

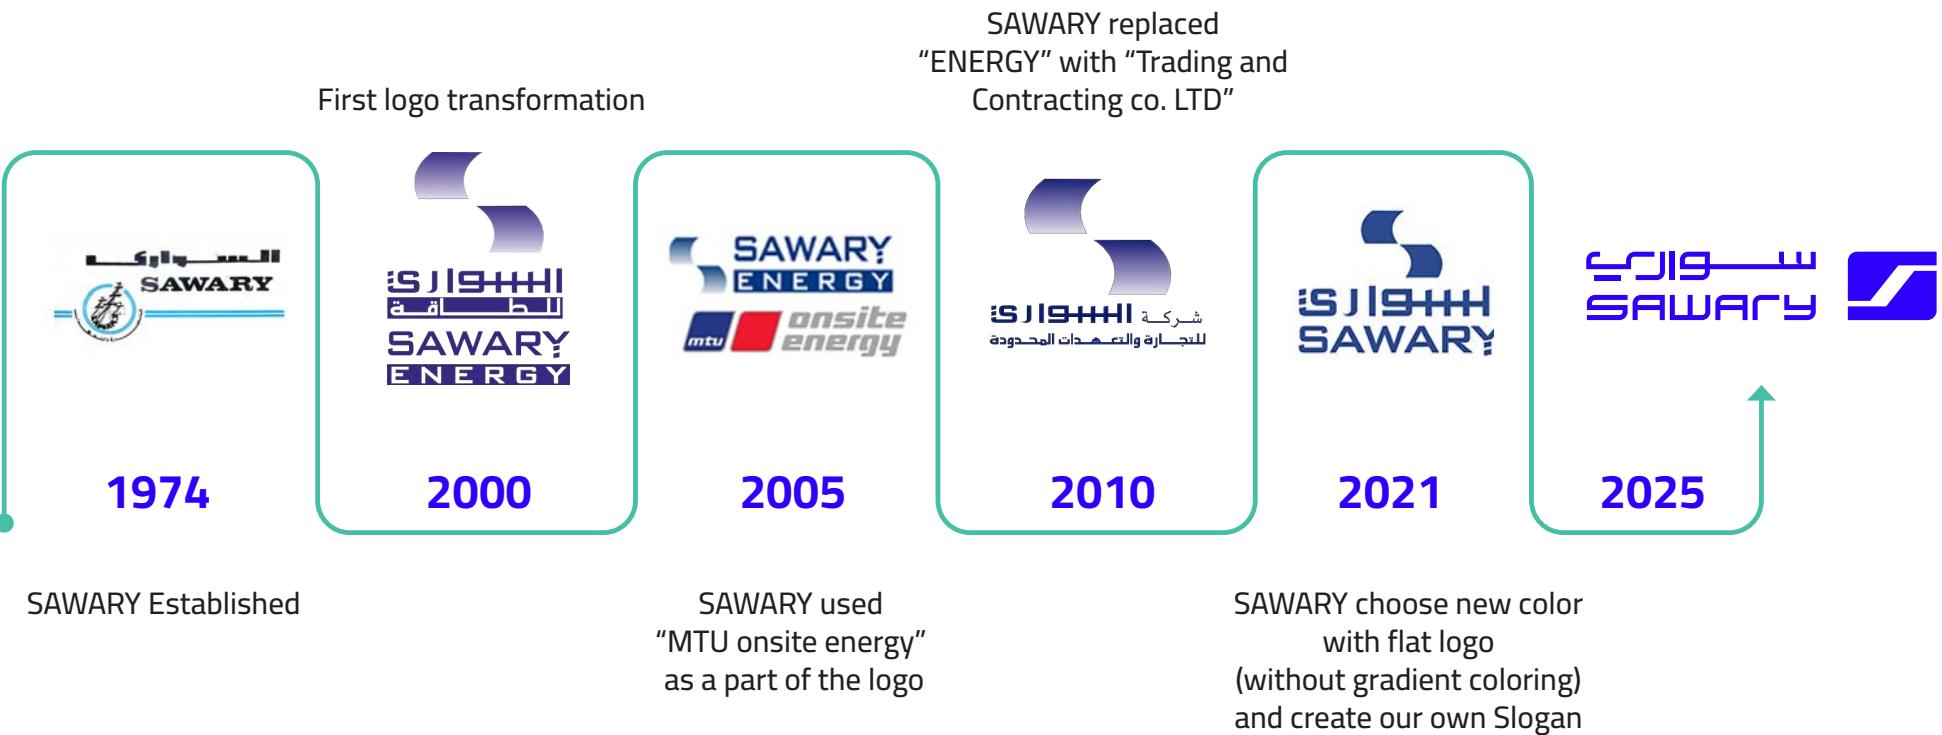

2021

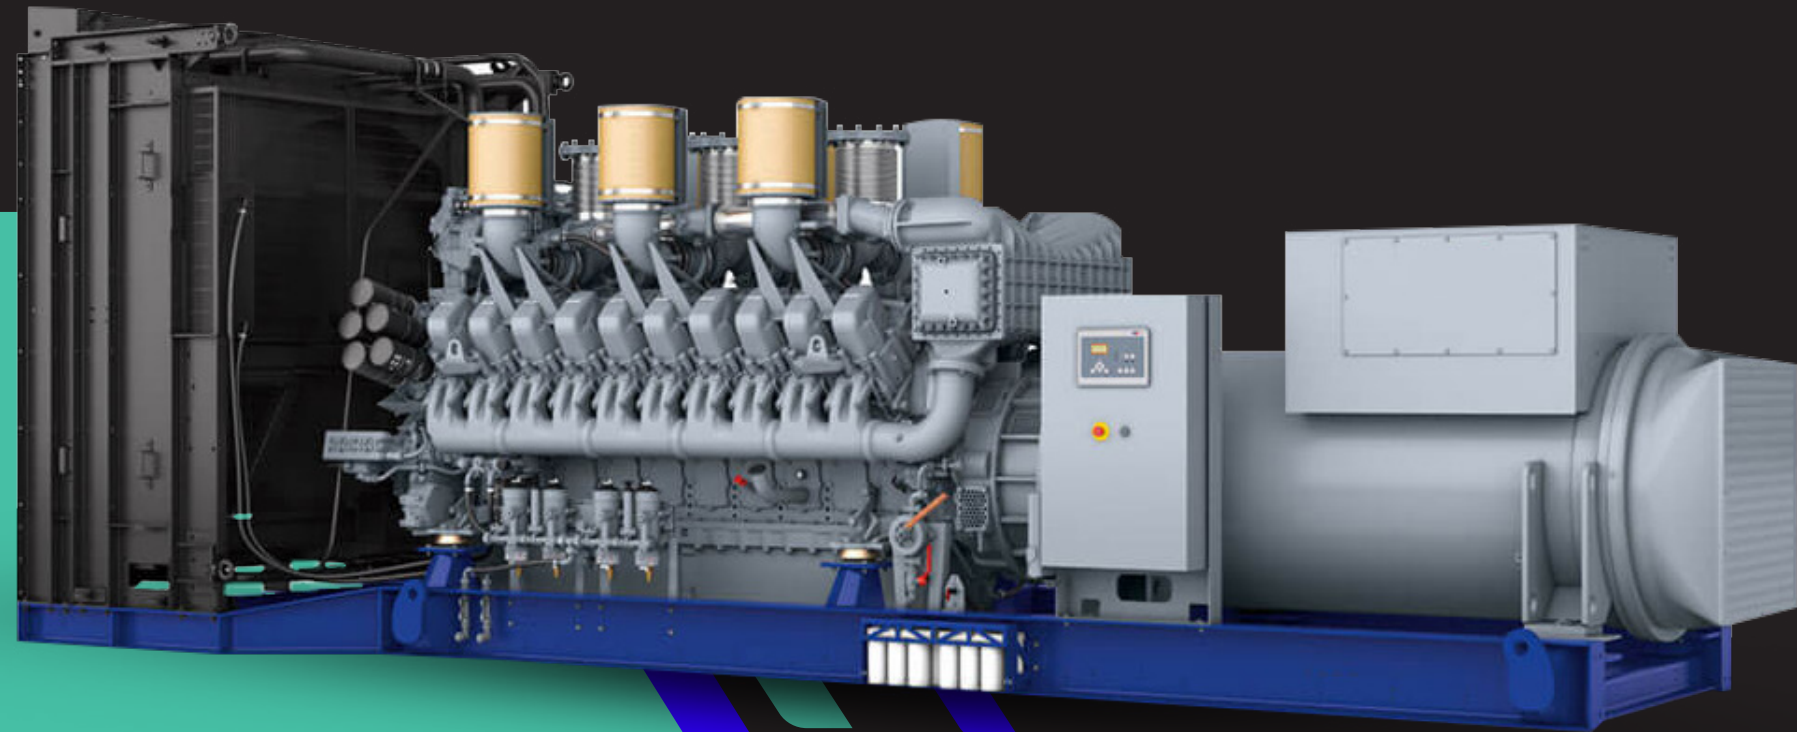

Expanded our portfolio by representing
JCB Power Systems, offering world-class
engines and generators.

2022

HISTORY RISING

As the only provider of electric diesel generators in Saudi Arabia with international certification from the US EPA, Sawary offers the greatest level of environmental compliance. But we are beyond only that.. After all, our goal is to work today toward a better, safer, cleaner, and more powerful tomorrow

OUR PARTNERS

Our long history in the diesel engine industry is reflected in the craftsmanship of the engines. Our three ancestors, Detroit Diesel Corporation in the US, MTU Friedrichshafen in Germany (a division of the Rolls-Royce Group), and others, have long been leading innovators and producers of diesel engines. In addition to our New Partner Global, the reputable UK-based JCB is a global player.

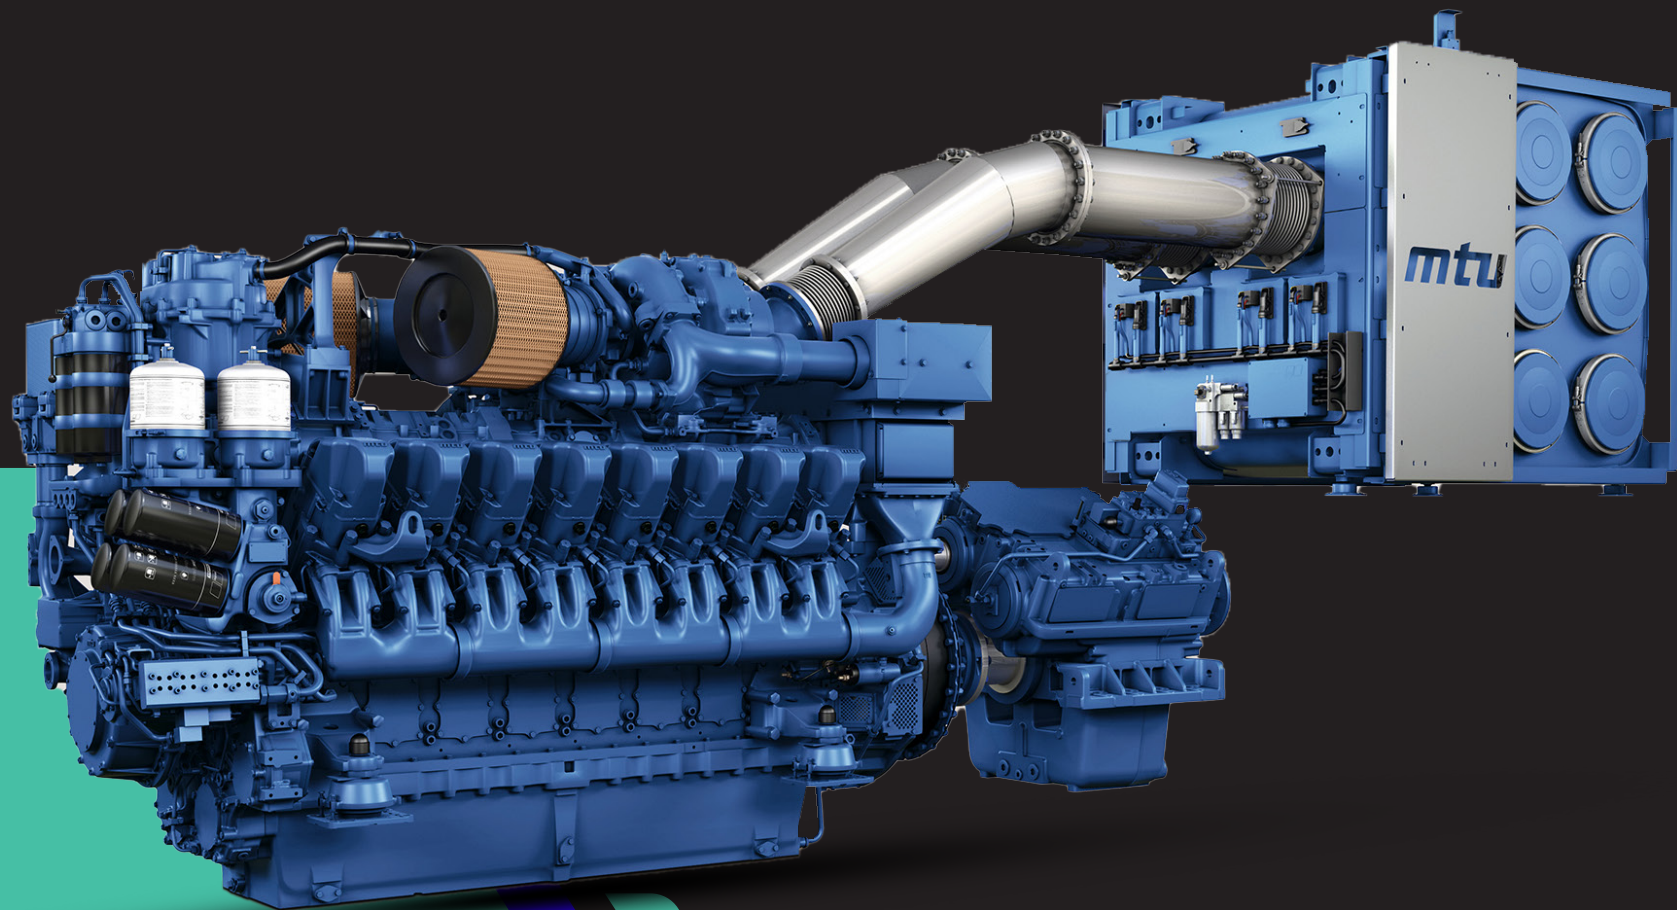

Along with our Global Leader Partners in respective Domains and Fields, we take great satisfaction in our Partners' Legacy and carefully choose our Partners and Associations. We are extremely fortunate to have collaborated with and represented companies like Parker (in the filtering industry), Shell (in the oil and lubricants industry), KCP (in the concrete pumps industry), and SIEL (in the alternative power supply industry).

POWER

POWER

MTU ROLLS-ROYCE

industrial applications are all dependably propelled by our strong and long-lasting engines.

MTU is the main brand of Rolls-Royce Power Systems AG, a major global supplier of complete drive systems, distributed energy systems, high- and medium-speed diesel and gas engines, and fuel injection systems for the most exacting specifications.

Based on its capacity for innovation, dependability, and system expertise, MTU blends a wide range of high-quality products with its own driving system expertise. No matter where you are based, you have access to the highest availability, which is your benefit along with MTU's entire product and customer services.

One of the top producers of big diesel engines and whole propulsion systems worldwide is Mtu;

Large ships, Agricultural and rail equipment,

industrial applications are all dependably propelled by our strong and long-lasting engines.

MTU PRODUCTS

Diesel generator sets from MTU Onsite Energy offer dependable answers to your power generation requirements.

Our generator sets are built to last thanks to their low fuel consumption, extended service intervals, and low emissions, all of which are supported by over 60 years of experience.

Global clients rely on us to deliver dependable power for a variety of uses, including independent power plants, data centers, healthcare facilities, airports, and manufacturing facilities.

AKSA

Offering a wide variety of dependable and fuel-efficient diesel, gas, and marine generators, AKSA Power has been a major player in the power generating industry for more than 50 years.

With solutions ranging from 1 KVA to a powerful 3000 kVA, AKSA can power homes, businesses, industries, and vital infrastructure, meeting a variety of needs worldwide. With an emphasis on sustainability and innovation, AKSA is dedicated to fostering a better future as well as empowering your present.

POWER GENERATION

With three manufacturing facilities in Tekirdag Cerkezkoy (Turkey, 60.000 m² of total space), Changzhou (China, 120.000 m² of total space), and Louisiana (U.S.A., 8.000 m² of total space), Aksa Power Generation is a leader and pioneer in the industry. It produces gasoline, diesel, natural gas, and marine generating sets with capacities ranging from 1 kVA to 3.125 kVA, as well as lighting towers and generator hardware. By 2025, Aksa Power Generation wants to be one of the top three producers in the world.

With 25 offices, three production sites, and two trade centers spread around Asia, Europe, and Africa, Aksa Power Generation is one of the top five worldwide companies in the industry and sells its goods to 178 countries.

SIEL UPS PRODUCTS

SIEL has been developing and researching technology for dependable energy and its production from renewable sources for more than 30 years.

SIEL has established itself as a global quality guarantee for its projects, systems, products, and services.

SIEL manages its energy and creates the best tools for every client, whether they are private or public. fundamental benefits for crucial sectors such as finance, healthcare, data centers, industrial facilities, and telecommunications.

FILTERS & INDUSTRIAL FILTRATION

Sawary Industrial Products

Pioneering Advanced Industrial Solutions

At Sawary, our Industrial Division stands at the forefront of technological innovation, delivering comprehensive, state-of-the-art solutions that drive operational efficiency, safety, and sustainability across critical energy and industrial sectors. We specialize in advanced filtration, heating, laboratory equipment, and process decontamination, tailored to the unique demands of Oil & Gas, Petrochemicals, Aviation, Power Generation, and related industries.

Key Offerings:

- **Advanced Filtration & Heating:** Cutting-edge systems for separation, purification, and thermal regulation, ensuring reliability and compliance.
- **Laboratory Equipment:** Precision tools for real-time monitoring, analytical assessment, and sustainable energy development.
- **Manufacturing & Rental Services:** Specialized industrial equipment manufacturing and flexible rental solutions for scalable operations.
- **Process Decontamination:** Expert service engineering for critical fluid purification, enhancing process integrity and environmental compliance.

Strategic Partnerships & Leading Brands:

Sawary's strategic alliances with industry-leading brands like PARKER (PECO, VELCON, Meggitt, Kitty Wake, Dominik Hunter, Twin Filter) and Thermon enable us to deliver unparalleled solutions. These partnerships ensure access to cutting-edge technologies in filtration, heating, and process optimization.

Commitment to Sustainability:

Sustainability is integral to our industrial strategy. We provide solutions that enhance operational efficiency while supporting global decarbonization initiatives and adhering to stringent environmental standards.

Conclusion:

Sawary Industrial Division is dedicated to providing innovative, high-performance solutions that address the complex challenges of modern industrial operations. Through our strategic partnerships, technological leadership, and commitment to sustainability, we are shaping the future of industrial efficiency, safety, and environmental stewardship.

PARKER-BALDWIN FILTERS

The developers at BALDWIN are constantly searching for methods to enhance our product.

Beginning with the fundamental filtration design and utilizing cutting-edge technologies like 3-D CAD modeling and stereo lithographic prototyping, the engineering team sets the standard with creative, patented solutions like self-venting fuel/water separator drain valves and Radial Seal air filters.

PARKER RACOR

In the field of engine filtration technology, RACOR is a world leader. With a dedication to providing our clients with the greatest solutions, Racor has been a pioneer in innovation for nearly 50 years, collaborating with top-tier auto manufacturers.

First-fit equipment design and manufacturing for many of the largest truck and bus brands is part of the line offering. Additionally, the same engine filter is available in the aftermarket, providing you with items that are %100 compatible with the warranty terms of the vehicle manufacturer and have the exact same fit, form, and class-leading performance as the original.

INDUSTRIAL FILTRATION-AVIATION

Parker Hannifins Aerospace Filtration Division (AFD) produces a variety of top-notch Parker Velcon filtration and separation systems as well as fuel condition monitoring devices to ensure clean, dry aviation fuel.

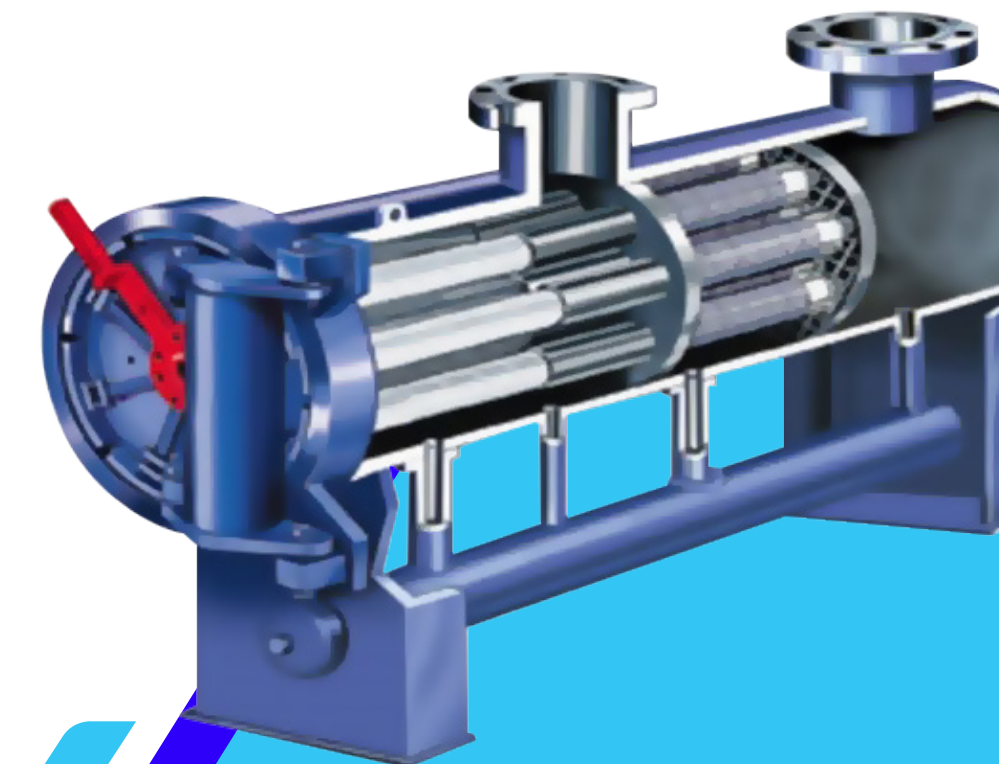

Parker AFD is the world leader in bulk aviation fuel filtration, and its proprietary products include clay canisters, water absorbent cartridges, fiberglass coalescers, micronic filters, and separators that are made to industry standards.

This comprises housings that satisfy best in class EI 1596 standards as well as a full range of cartridges qualified to the most recent editions of EI specifications: EI 1581, EI 1583, and EI 1590.

In order to handle and filter military fuel, Parker AFD has created and provided coalescers and separator cartridges for ships that meet the strict military fuel filtration requirements, particularly EI1581, as well as the qualification processes for aviation jet fuel filter/separators, Category M and M100.

Today's Tier 4F and Stage IV high pressure common rail engines require extremely clean fuel, which Parker CLEANDiesel filtering technologies are made for. Among the applications is mining. Dry, clean fuel engineering

INDUSTRIAL FILTRATION-PROCESS

The PECO product line has been at the forefront of oil and gas filtration solutions for more than 80 years.

Consumers rely on the PECO brand to tackle complicated pollutant control challenges because of its performance and quality.

The total cost of filtration includes both the cost of the Filter itself and the total amount of maintenance that the Filter can save.

By incorporating PECO filtration vessels and cartridges into your process, you may reduce the accumulation of contaminants in process equipment, safeguard vital equipment from harm, reduce downtime, save energy, and maintain gas and liquid streams within specifications.

Offering solutions for the oil and gas sector, gas gathering, offshore injection water, and power generation.

Refining Onshore produced water, Gas Processing, NGL Pipeline & Storage Petrochemical, Fractionation, and Gas Transmission as Storage Mining.

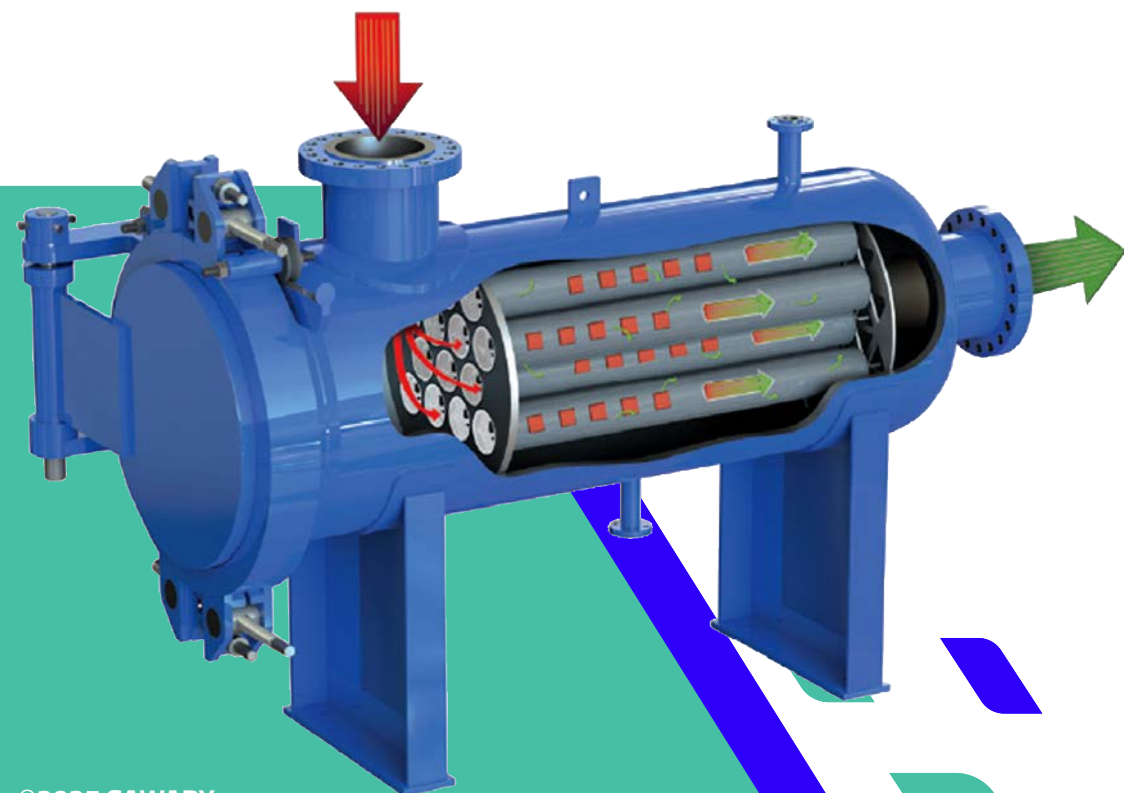

PARKER DOMNICK HUNTER

The carbon steel and stainless steel pressure vessels and filtering systems produced by Parker Domnick Hunter's Process Division are made to satisfy both particular client application needs and international industry standards.

We have designed and manufactured significant systems for a variety of industries thanks to our experience and skills, including pharmaceutical, chemical, food and beverage, and industrial fermentation.

A variety of microfiltration cartridges for liquid and gas applications are produced by Parker Domnick Hunter's Process Division using the most up-to-date production methods, combining the best membranes and filtration media with the newest user-friendly designs.

PARKER KITTIWAKE

Parker Condition Monitoring is an expert in offering both on-site and online solutions for the monitoring of vital industrial and plant machinery. Our equipment parts and sensors enable quick and well-informed decision-making, extending the lifespan of your gear.

As experts in condition monitoring systems, we only provide approaches that focus on the initial phases of defect identification.

This guarantees that you receive accurate and fast information regarding the vital state of your machinery and plants. Find out more about our products for fluid cleanliness, wear metals, bunker fuel testing, and used oil analysis.

For more than 25 years, the mining, oil and gas, rail, aviation, marine, and power generation industries have employed Parker Kittiwake condition monitoring products.

Condition monitoring of the entire fleet extends the life of the machinery and lowers maintenance costs, lessens wear and, in the end, increases clients' profitability by cutting operating expenses.

PARKER | Twin Filter

Founded in 1985, Twin Filter B.V. is a Dutch firm that specializes in designing, producing, and manufacturing filtering systems for a wide range of domestic and international industries.

Twin Filter joined Parker Hannifin Corporation as of November 2012,1. Parker Hannifin is a global leader with a strong strategic focus on the oil and gas sector thanks to Twin Filter.

But Parker Hannifin is also very valuable for growing the food and beverage and Twin Filter process businesses.

- Water application self-cleaning filter units
- Filtration systems for drinking water
- Gas and Oil Systems for drilling filtration
- Systems for obtaining water
- Desalination plant pre-filtration
- Separation of water and oil

PUROLATOR

For over 50 years, Purolator, a Parker brand, has created and produced a wide variety of metallic, porous, sintered filter products to meet the demands of various markets.

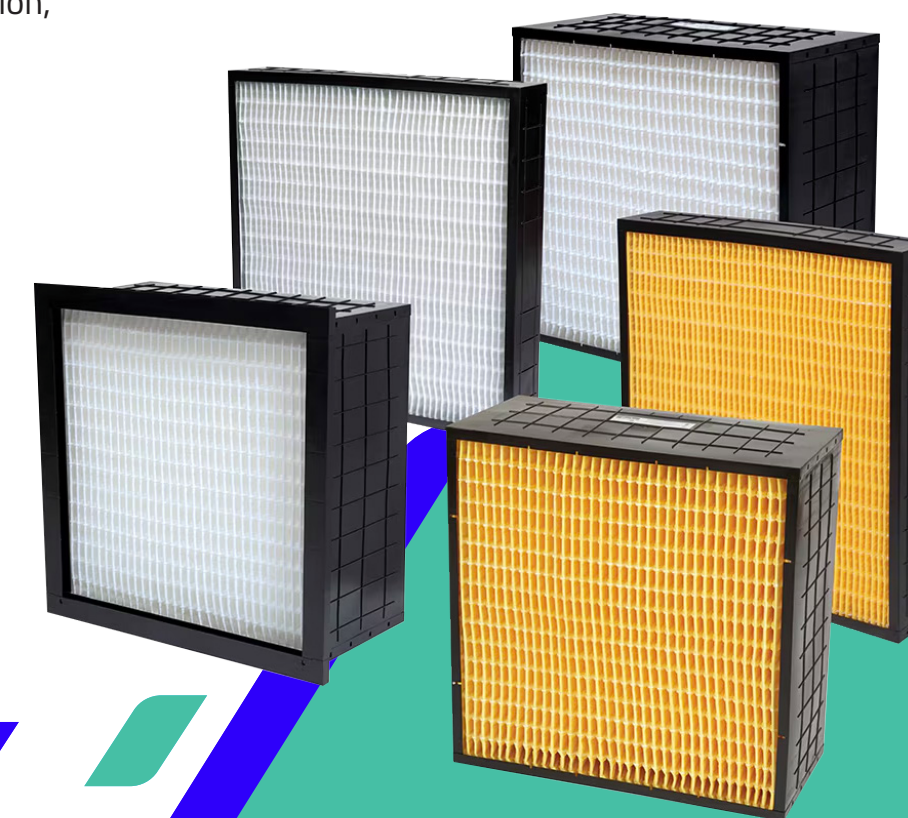

Superior metallic filtration products from Parker give you exact control over corrosion resistance, strength, and permeability for your applications.

Many conventional and customized items are available for fluidization, separation, liquid and gas filtration, and many more uses

PRODUCT OFFERINGS CONSIST OF

- Stainless steel components that are cleanable
- Self-cleaning filters
- Media for fluidizing
- Filtering tubes of Septa

These manufactured metal goods are employed in a variety of industrial processes, including chemical processing, power generation, pharmaceuticals, and refineries.

Thermon & F.A.T.I. – Global Leaders in Industrial Process

In the field of industrial process heating, Thermon stands as a recognized global leader—trusted by clients across the energy, chemical, petrochemical, and manufacturing sectors. Since its founding in 1954, Thermon has built its reputation by delivering custom-engineered, end-to-end heating solutions that ensure reliability, safety, and performance in even the most demanding environments.

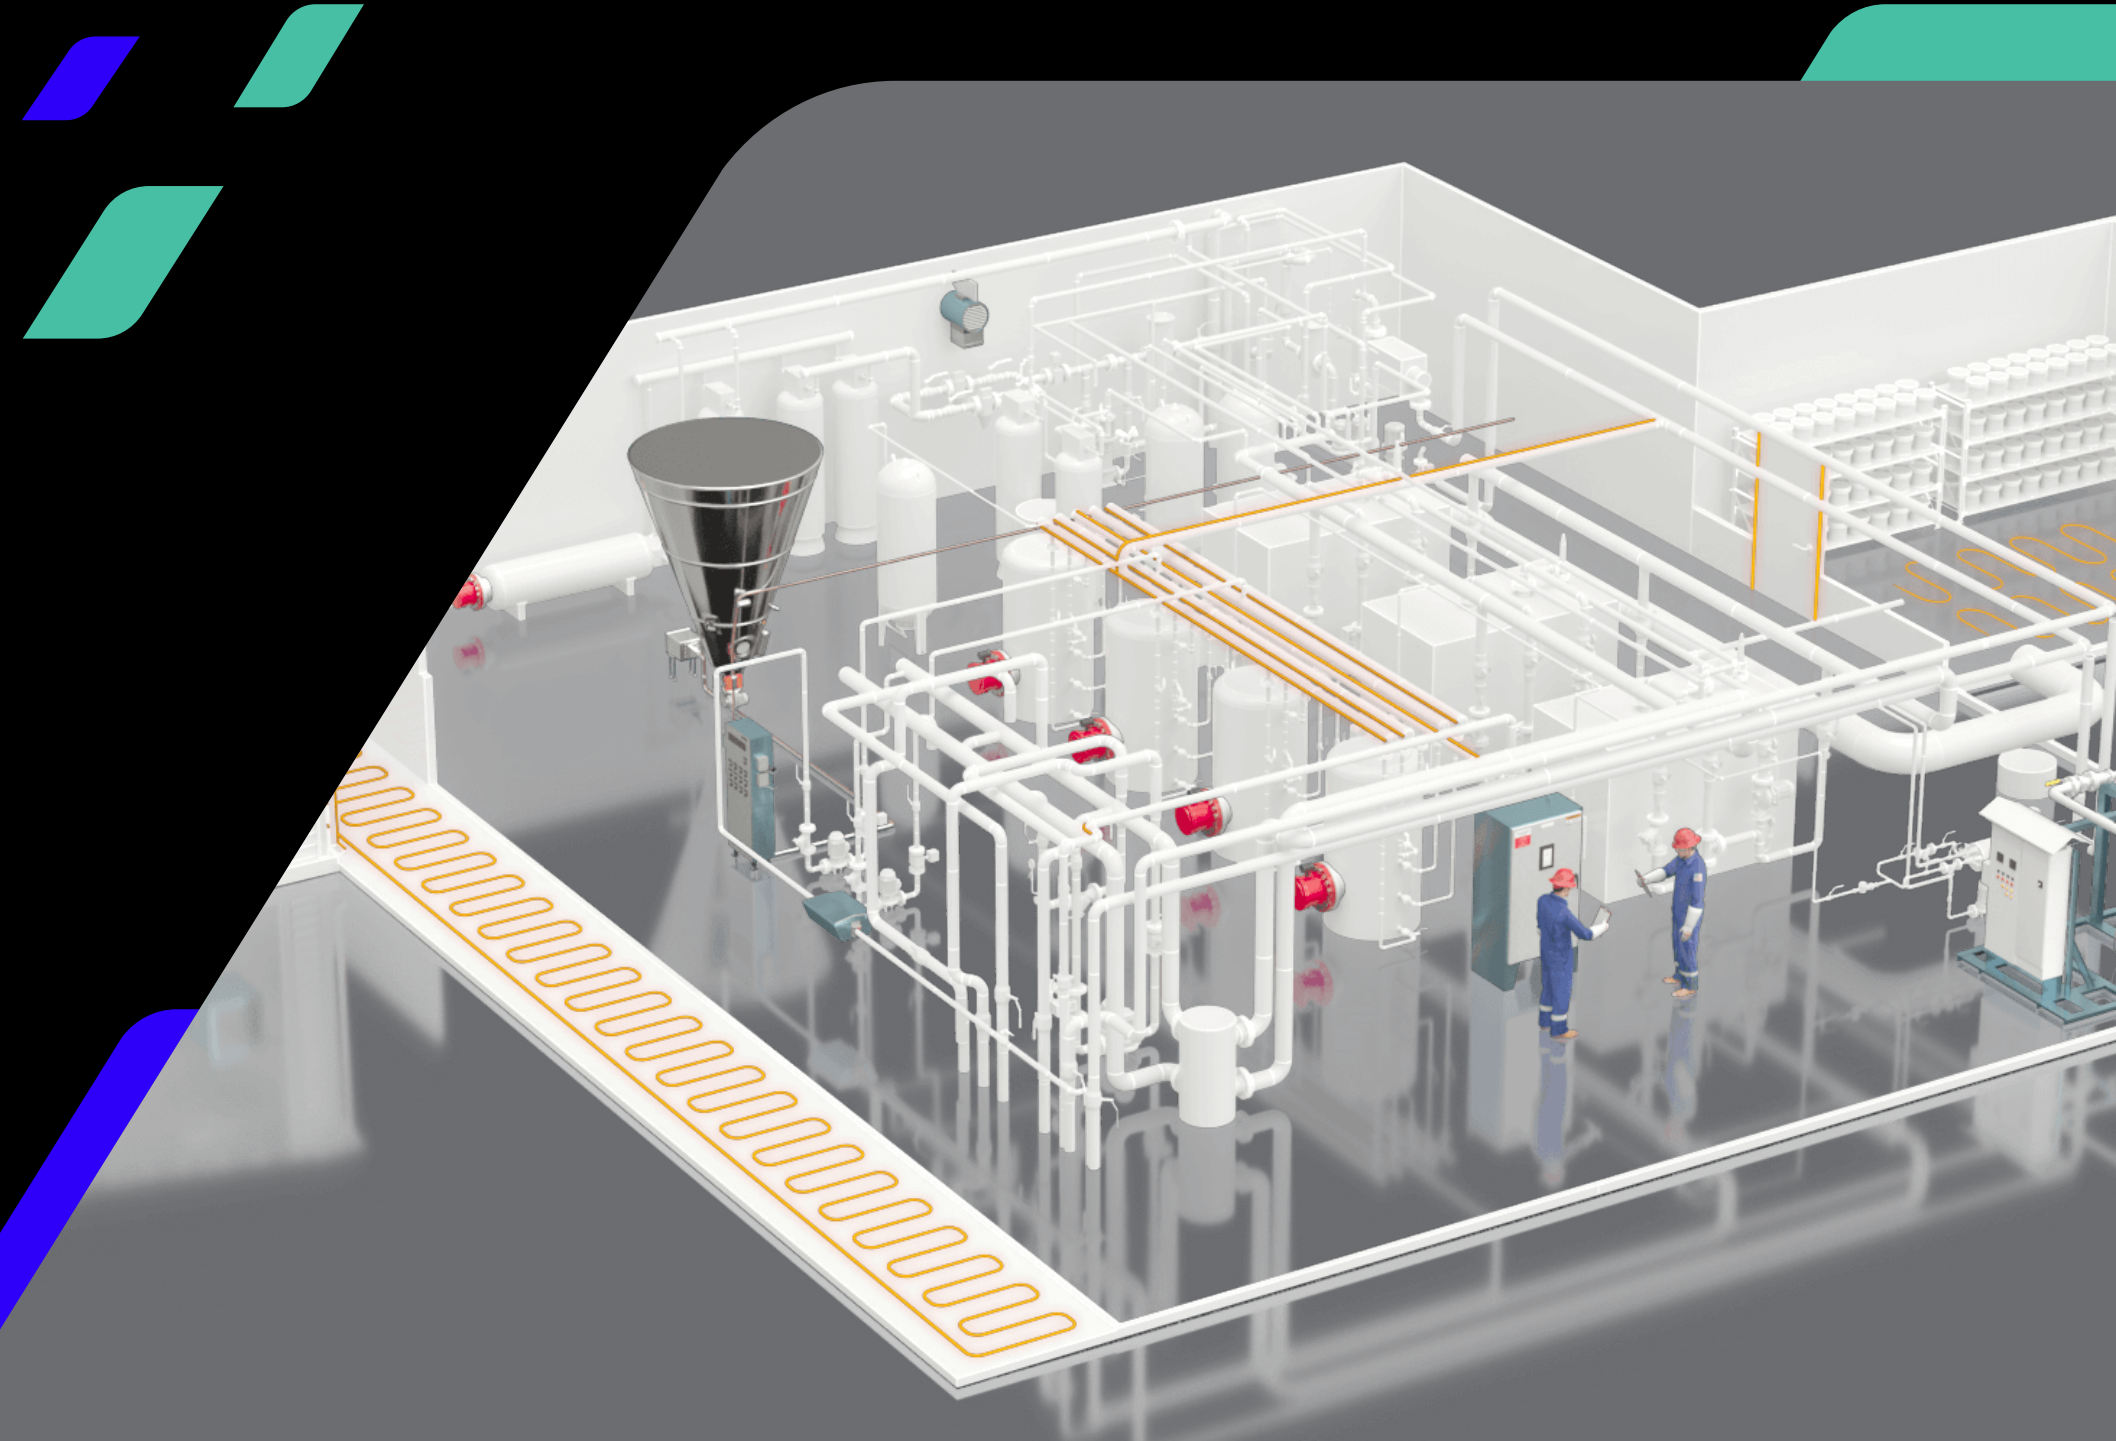

Through its acquisition of F.A.T.I., an Italian manufacturer with over 75 years of experience, Thermon has expanded its product portfolio to include a wide range of electric process heaters and control systems, such as:

- Flanged immersion heaters
- Duct heaters
- Explosion-proof and ATEX-certified heating systems
- Custom control panels and temperature management systems
- Circulation heaters
- Heated skids and packages

Backed by decades of engineering expertise and a global presence, Thermon continues to advance industrial heating solutions. The focus remains on efficiency, equipment protection, and process stability across critical operations.

Together, Thermon and F.A.T.I. serve a wide range of industries, including:

- | | | | |
|-------------------|--------------------|----------------------------|--------------------|
| - Oil & Gas | - Power Generation | - Chemical & Petrochemical | - Pharmaceutical |
| - Food & Beverage | - Mining | - Water Treatment | - Renewable Energy |

CONCRETE EQUIPMENT

CONCRETE PUMPS

WE OFFER TRUCK MOUNTED **CONCRETE PUMPS**
IN A VARIETY OF SIZES
WE ARE EXCLUSIVE PARTNERS WITH
KCP KOREAS TOP SUPPLIER OF CONCRETE PUMPS

A Concrete Pump is a sizable piece of machinery used for moving concrete that is affixed to a carrying truck.

Steel or flex concrete putting hoses must be manually connected to the machine's outlet in order to use this pump.

Connected hoses lead to the location where the concrete must be placed.

Line pumps are utilized for lesser volume concrete placement applications and pump concrete at a lower volume than boom pumps. Right now, we are solely focused on boom pumps.

Boom placement is/will be possible, particularly in large-scale and high-rise construction projects, which we will be pursuing gradually.

ITALTOWER LIGHTS

ITALTOWER Light Towers are made to last for any purpose, including providing light in any location at any time.

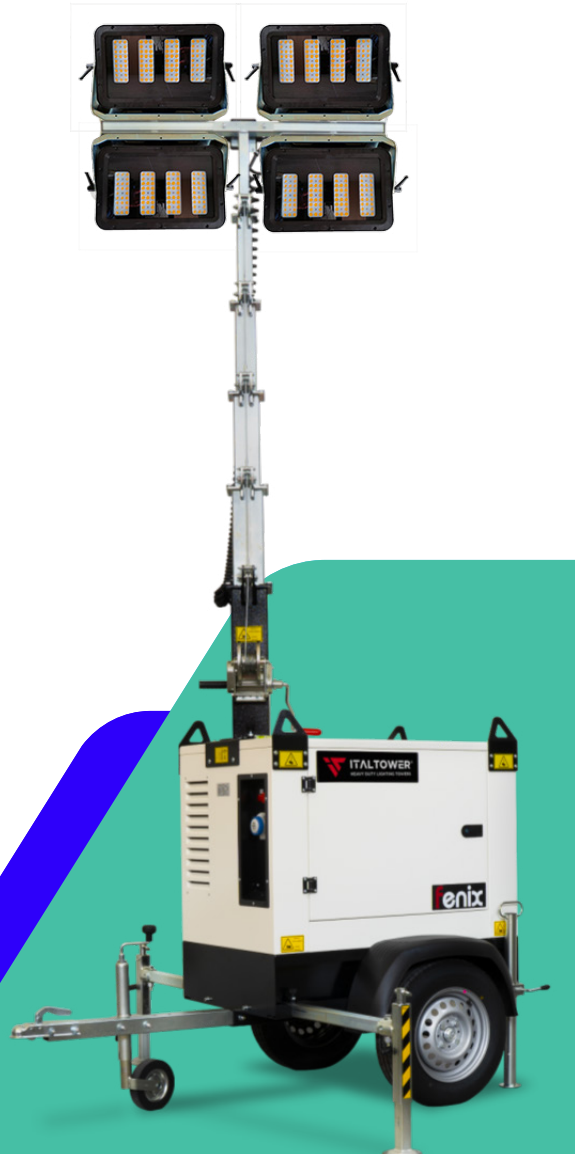

Construction sites, events and performances, industrial applications, road construction sites, civil protection, and rental properties are among the application areas where models excel. The selection is quite varied; you may discover solutions for any purpose, with various technical features to meet customer needs, and with all the features you require to work fast, safely, and easily.

The company's primary goal is to satisfy end users' diverse needs by providing dependable and high-quality lighting towers.

Italtower has consistently made investments in R&D (Research & Development) to provide cutting-edge, reasonably priced, and inventive goods. had an amazing experience in the rear.

The multiple certifications of the Light Towers manufacturing demonstrate that Italtower is a company that consistently innovates.

Because all of SAWARY's products are made in their facilities using parts from top Italian and European manufacturers, you may receive a wide variety that fully embodies the Made in Italy ethic. The CE, CSA/UL, EAC, and SASO certifications attest to the products' quality.

ITALTOWER LIGHTS

Product innovation involves the use of materials and technology that ensure longevity and dependability. These goods are regularly being updated to reflect the newest market trends and technological advancements. To create a unique product of its kind, every aspect-including technological know-how, dependability, ease of use, safety, and originality-is meticulously investigated.

These Lighting Tower models' designs are carefully crafted to preserve the product's characteristics and usefulness while seamlessly adapting to any kind of application.

**Over Twenty Years Of Expertise
In The Electronic
and Mechanical Fields**

AFTER SALES

SERVICE OPERATIONS

Our team of experienced technicians delivers top-tier service and maintenance solutions, including:

Overhauling: Expert engine and component overhauls to restore equipment to peak performance in our facilities across the kingdom with ability for the on-site overhaul.

Long-Term Maintenance Contracts: Tailored maintenance agreements with scheduled onsite visits and services, providing predictive maintenance to minimize unexpected disruptions and maximize equipment lifespan.

Urgent Maintenance: Rapid response to critical equipment failures with prompt on-site service to minimize downtime and get your operations back online quickly.

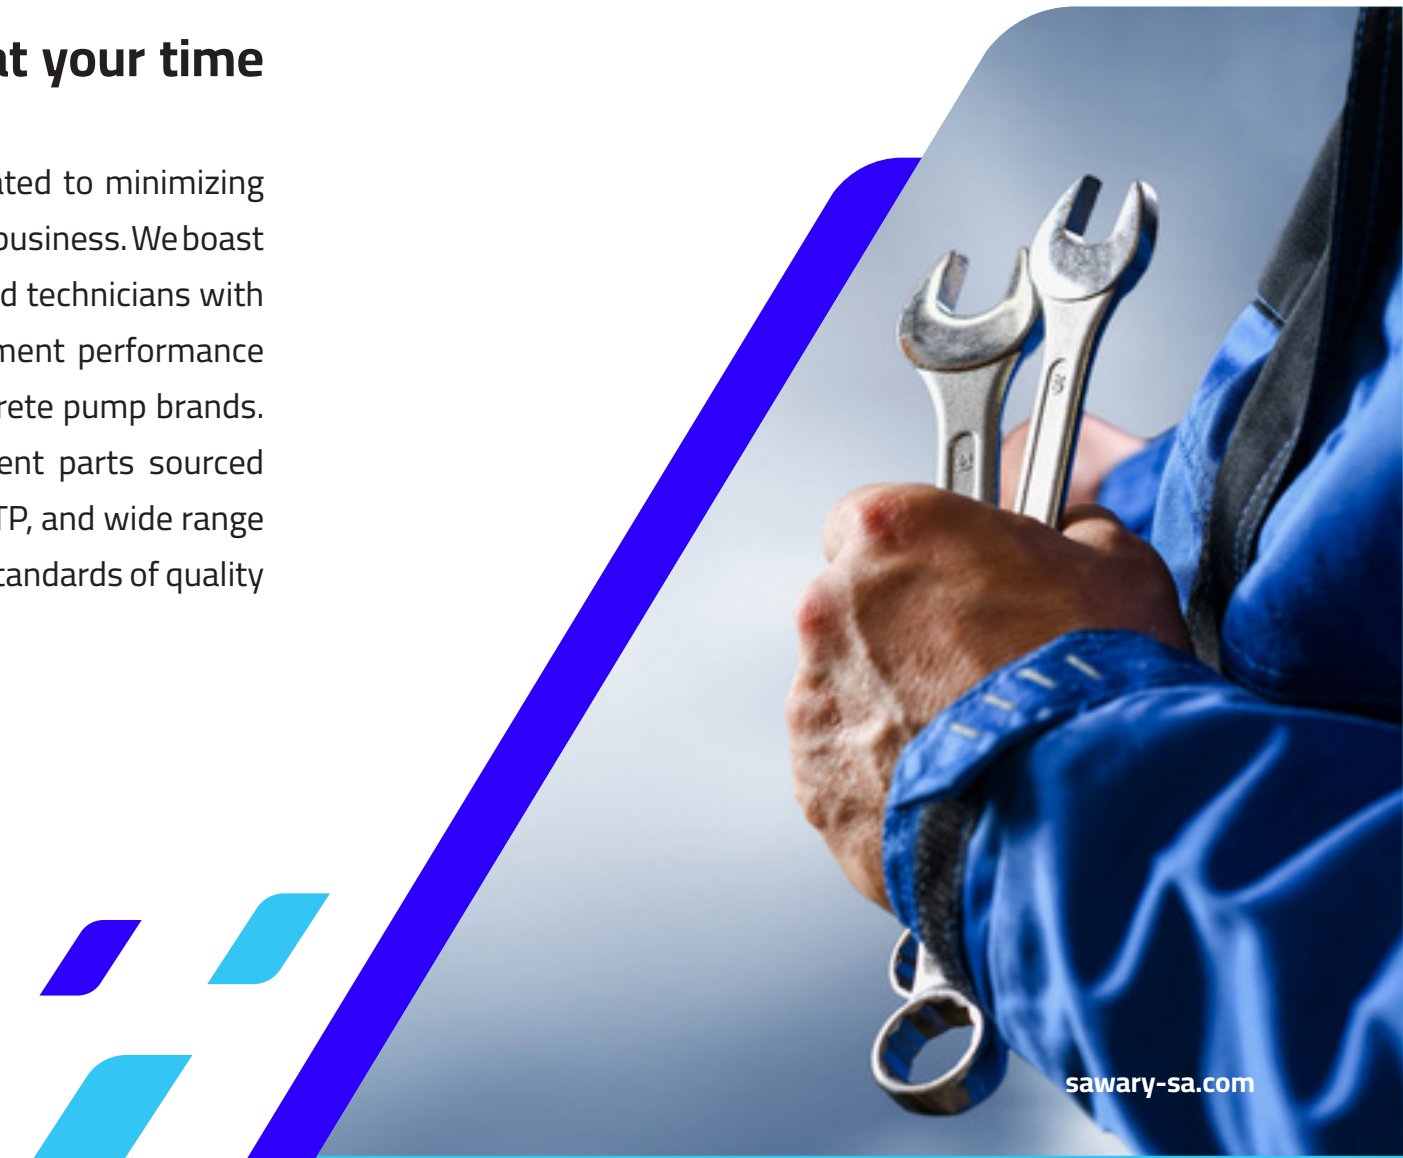

This commitment to quality and expertise, combined with our comprehensive service offerings and our team's vast experience by using the special tools that recommended by the manufacturer with a complete guidance from the authorized service manuals, ensures maximum uptime and minimizes operational disruptions, allowing you to focus on your core business objectives.

PRODUCT SUPPORT SPARE PARTS

At Sawary, we understand that your time is valuable.

Our service and maintenance division is dedicated to minimizing downtime and allowing you to focus on your core business. We boast a team of highly skilled and experienced certified technicians with extensive expertise in ensuring optimal equipment performance for a wide range of power generators and concrete pump brands. We utilize genuine and high-quality replacement parts sourced from renowned partners such as MTU, AKSA, CTP, and wide range of multi-brand parts guaranteeing the highest standards of quality and reliability.

SERVICE OPERATIONS

01

Comprehensive Overhaul Services:

Expert overhauls for MTU, Cummins, Caterpillar, Mitsubishi, Doosan, Volvo, John Deere, Perkins engines, and more.

02

Performance Load Testing:

Ensure optimal engine performance with comprehensive load testing and analysis.

03

Proactive Maintenance Solutions:

Corrective and preventive maintenance programs tailored to your specific engine needs.

04

Multi-Brand Expertise:

Factory-trained technicians proficient in servicing a wide range of engine makes and models.

05

On-Site Service & Support:

Expert technicians dispatched to your location for convenient and efficient service.

06

24/7 Support:

Round-the-clock availability for emergency repairs and technical assistance.

07

Minimize Downtime:

Rapid response times and efficient service to get your equipment back online quickly.

08

Maximize Engine Lifespan:

Extend the life of your valuable assets with our expert service and maintenance.

09

Customized Service Agreements:

Flexible service plans designed to meet your operational requirements and budget.

10

Flexible Service Contracts:

Long-term and short-term service agreements available to meet your specific requirements.

COSTEX TRACTOR PARTS CTP

Costex Tractor Parts CTP® is a top-tier global provider of engines,

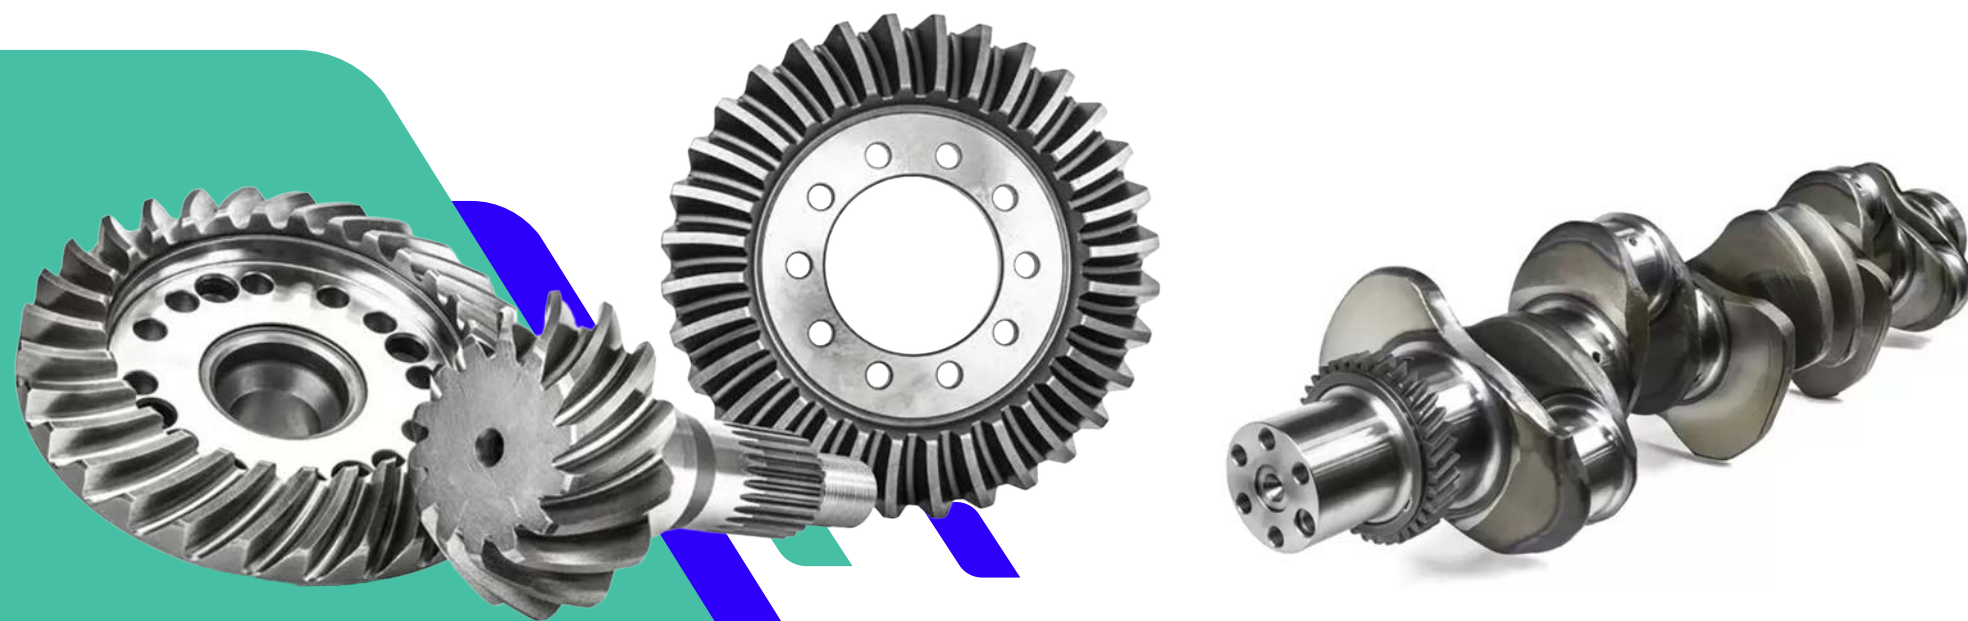

equipment, and new replacement Komatsu® and Caterpillar® parts. CTP, which offers premium heavy equipment components, is committed to provide you excellent replacement Caterpillar® parts at competitive prices.

To guarantee the quality of our goods, our new replacement components go through rigorous and stringent inspection processes.

You may take a break whether you're digging an irrigation canal on the family farm or mining copper at high elevations in the Chilean Andes.

Be sure that our staff and high-quality parts will support you at every turn.

A vast array of high-quality aftermarket replacement parts are available from Bearing, Piston, Crankshaft, Fuel Injector, Liner Kits, Valves, GET (Ground Engaging Tools), Gasket Kits, To Overhaul Kit, and all CTP products.

At Sawary Rental Solutions, our mission is clear:

to redefine rental services in Saudi Arabia and become the go-to partner for businesses across the Kingdom.

With a comprehensive network of branches, we aim to deliver tailored solutions that meet every need—whether it’s short-term convenience or long-term partnerships.

As your all-in-one rental provider, we offer a seamless experience powered by flexible arrangements, globally trusted brands, and an unwavering commitment to the highest standards in quality, health, and safety.

From oil & gas to construction, manufacturing to retail, marine to events—we serve a diverse range of industries, ensuring they have the tools to succeed.

Our latest investments in cutting-edge generators and advanced tower lights enable us to meet the growing demands of Saudi Arabia’s thriving events sector.

Designed to exceed the rigorous expectations of the entertainment industry, our equipment blends durability, performance, and aesthetic appeal, making it the perfect choice for concerts, festivals, sports events, and roadshows.

But we don't stop there our fleet is continually expanding with innovative, state-of-the-art equipment to stay ahead of customer needs.

Through strong partnerships with reliable global suppliers, we enhance our fleet with rigorously tested, high-quality products, delivering fully integrated solutions under one roof.

This eliminates the hassle of dealing with multiple vendors streamlining the process so you can focus most—your business..

At the core of it all is our commitment to you, our customer. From 724/ technical support to our unmatched operational efficiency, everything we do is designed to put your success first.

Sawary Rental Solutions isn't just a service—it's a partner you can trust to power your ambitions and elevate every project to new heights
