WHO WE ARE

Our Purpose

Our goal is to maintain a good reputation, the trust and satisfaction of our employees, customers and suppliers through our Core Values, to ensure the continuity of achieving profitable growth by working and investing in the field of Machinery, Power, Water, and Aftersales/Aftermarket Solutions

Our Values

We pride ourselves on upholding the 5 core values, which will guide the decisions we make as we pursue our ambitions.

Efficiency & Responsibility

- Working professionalism
- Integrity & Compliance

Teamwork

- Cooperate in the spirit of one team.

Customer Satisfaction

- Earning loyalty and satisfaction every time.

Continuous Improvement

- Passion and desire for ongoing learning and development.

Our Vision

To pursue a leadership position through diversification and growth in Saudi Arabia and beyond, while continuing to explore solutions to lead on the Sustainable Energy Space.

Our Mission

- Become an active player in the Kingdom's 2030 Vision and beyond.
- Become an employer of choice in the country and move towards becoming more of a corporate (vs. a simple family business)
- Provide customers with bespoke solutions in multi sectors
- Invest in sustainable energy solutions in line with Saudi Green Initiative.

SUMMARY

Forget reliability, think thriving. For nearly five decades, Sawary has been more than just a power company – it's been the lifeblood of Saudi Arabia's ambitions. Since 1974, we've illuminated homes, fueled industries, and ignited potential, weaving a seamless story of uninterrupted power across the kingdom.

From land to sea, from businesses to battleships, Sawary doesn't just provide power, it empowers. We are the one-stop shop for progress, offering a symphony of solutions – generators, engines, UPS systems, parts, filters, services, and even concrete equipment. It's a complete power orchestra, conducted by our unrivaled expertise, to propel your dreams into the future.

SAWARY Heritage

From Pioneering Sparks to Radiant Progress: The Sawary Story

In bustling Jeddah, back in 1974, a bright idea flickered in the mind of Sheikh Ahmmed Al Sulaiman. He dreamt of a Saudi Arabia buzzing with life, its cities shining, its factories whirring, all powered by the steady hum of electricity. That's how Sawary began – not just a company, but a promise to fill homes with light, fuel businesses with energy, and ignite the potential within every person.

It started small, a spark in Jeddah that soon grew into a powerful wave of progress, sweeping across the kingdom.

The early days were an adventure on uncharted terrain. Like brave explorers facing the unknown, Sawary's pioneers forged their own path. They tackled tricky technical problems, won the trust of customers, and made powerful allies along the way. Every cable laid, every machine whirring, every switch that flickered on was a victory for their mission: to bring progress to Saudi Arabia. Their tools were blueprints and schematics, not maps and compasses, and their language was the simple yet powerful one of electricity.

SAWARY Heritage

From Pioneering Sparks to Radiant Progress: The Sawary Story

As the years passed, Sawary grew alongside the nation. They brought light to bustling factories, vibrant cities, and even tiny villages hidden in the vast desert. They became the silent engine of progress, the helping hand guiding Saudi Arabia into the exciting age of electricity. But Sawary never stood still. They looked beyond their borders, seeking partnerships and knowledge, always hungry for new ways to grow. From big companies around the world to bright minds just starting out, they welcomed everyone, joining hands to create a web of expertise as intricate as the kingdom's own history.

Today, Sawary stands tall, a shining symbol of power and progress. It's a testament to the founder's vision, the pioneers' hard work, and the trust of countless partners and customers. This isn't just the story of a company, it's the story of a nation's journey, lit up by Sawary's unwavering light. A journey that, like the sun rising over the Arabian Sea, will continue to bring brighter and brighter tomorrows to Saudi Arabia. Sawary: Where dreams find their plug, progress sparks like a light bulb, and power shines bright on the ambitions of a nation.

OUR PARTNERS

Legacy of Excellence

The craftsmanship of the Diesel Engines is a reflection of our strong heritage in the diesel engine business. Our ancestral company, MTU Friedrichshafen in Germany, (part of Rolls-Royce Group), is a long-time dominant force in diesel engine innovation and manufacturing. In addition to our New Partner Global world-wide well established JCB from the UK, and AKSA Power Generation from Turkey.

In addition to our World-Wide-Leader Partners in their Fields and Domains;

We pride ourselves with our Partners Legacy and we select very carefully our Partners and Associations. We are very lucky to have partnered and represented brands and names such as Parker (in the Filtration), Shell (in the Oil & Lubricants), KCP (in the Concrete Pumps), SIEL (in the alternative Power Supply), CTP Costex Tractor Parts (in Engines and Truck Parts), Thermon (in Process Heating), and ItalTower (in Heavy Duty Lighting Towers).

MTU On-site Energy diesel Generator sets provide Reliable solutions for your Power generation

JCB is a British equipment manufacturer established in 1945 JCB Manufacture Construction, Agriculture, Waste Handling, and Demolition Equipment

AKSA Power has been a leading force in the world of power generation, With a commitment to innovation and sustainability

Since 1983 SIEL has been engaged in the creation reliable energy and for its generation from renewable sources

KCP is the #1 Korean Concrete Pump Provider and Manufacturer in Korea The company was established in 2002

Baldwin's filters and Racor Filter are built to last. Delivering superior efficiency throughout the entire service interval, Baldwin & Racor filters provide the protection needed

ItalTower, a leading Italian Manufacturer with a total Focus on heavy duty Lighting towers

Costex Tractor Parts CTP® is a worldwide quality supplier of New Replacement Caterpillar® Parts and Replacement Komatsu® Parts, equipment and engines.

Thermon is a global leader in process heating. they provide custom-engineered and comprehensive solutions for all their heating needs.

Shell is a World Renown Oil & Gas and Lubricants Provider

Delivering a variety of A-Grade Products for customers for years

MTU ROLLS-ROYCE ENGINES

MTU is the core brand of Rolls-Royce Power Systems AG, which is a world-leading provider of high- and medium- speed diesel and gas engines, complete drive systems, distributed energy systems and fuel injection systems for the most demanding requirements.

Based on its innovative capabilities, its reliability and system competence, MTU combines unique drive system know-how and a large range of products of excellent quality. Together with MTU's full product and customer services the benefit is yours, as highest availability is on your disposal, no matter where you are based.

MTU is one of the world's leading manufacturers of large diesel engines and complete propulsion systems. Our robust and durable engines reliably propel large ships, heavy agricultural & rail vehicles, and industrial applications

MTU Applications:

- Construction & Industrial Equipment
- Mining
- Commercial Marine
- Oil & Gas
- Rail
- Yacht
- Agricultural Machines
- Marine & Land Defense
- Gen-drive

MTU is one of the world's leading manufacturers of large diesel engines and complete propulsion systems. Our robust and durable engines reliably propel large ships, heavy agricultural and rail vehicles, and industrial applications

ADVANCED MONITORING

MTU Energy diesel generator sets provide reliable solutions for your power generation needs. Featuring low fuel consumption, long service intervals and low emissions backed by more than 60 years of experience, our generator sets are designed to perform. Customers around the world trust us to provide reliable power for a wide range of applications, like healthcare, data centers, airports, manufacturing plants & independent power stations.

Our product portfolio covers diesel generator sets up to 3250 kw.

Battery Storage / Micro Grid Solutions

A Rolls-Royce solution

Embarking on the future of Sustainable Energy with our partner Rolls-Royce MTU

We are a Proud Partner of JCB

A world-renown British equipment manufacturer established in 1945

JCB offers an extensive range of high specification diesel generators to meet customer requirements for any power application globally. Each JCB generator is built to the highest specification to deliver outstanding reliability, high performance and increased efficiency.

- JCB manufacture Construction, Agriculture, Waste Handling, and Demolition equipment
- JCB is a Private Company
- Total number of Employees is 11,000
- Revenue is 4B+ Pounds in 2019
- Power Generators is a division of JCB, that was established in 2006

We represent JCB Power Division in KSA

AKSA Power Generation

AKSA: Powering Your World for Over 50 Years

For over five decades, AKSA Power has been a leading force in the world of power generation, offering a comprehensive range of reliable and fuel-efficient diesel, gas, and marine generators. From powering homes and businesses to supporting industries and critical infrastructure, AKSA's solutions range from 1 kVA to a mighty 3000 kVA, catering to diverse needs across the globe. With a commitment to innovation and sustainability, AKSA is not just about powering your present, but also contributing to a brighter future.

Aksa Power Generation manufactures gasoline, diesel, natural gas and marine generating sets range between 1 kVA to 3.125 kVA as well as lighting towers and generator hardware with 3 manufacturing facilities in Tekirdag Cerkezkoym (Turkey 60.000 m² of total space), Changzhou (China 120.000 m² of total space) and Louisiana (U.S.A., 8.000 m² of total space); and in trade centers which located in The Netherlands and U.A.E. has become a leader and pioneer within the sector. Aksa Power Generation aims to rank among the top three global manufacturers by 2025.

Aksa Power Generation sales to 178 countries its products and is among the top five global firms of the sector with 25 offices, 3 production facilities and 2 trade centers located in Asia, Europe, Africa and America.

SIEL UPS Products:

Choosing SIEL means relying on experts to find the best solution in daily activities

Safe Power Modular
100 to 1560 kVA

Safe Power EVO
100 to 600 kVA

Safe Power S
10 to 80kVA

For over 30 years, SIEL has been engaged in the creation and research of technologies for reliable energy and for its generation from renewable sources.

SIEL's projects, products, systems and services have become a guarantee of quality at an international level.

From private to public, SIEL builds the most suitable tools for each customer and manages its energy in safety: fundamental advantages for highly critical areas such as those of finance, health, data centers, industrial plants and telecommunications.

Professional Lighting Towers

Building on twenty years of experience in the mechanical and electronic sectors.

Italtower Light Towers are designed to be long-lasting for any application: to bring light to any place and at any time.

With models are ideal in the following fields of application: construction sites, events and shows, industrial applications, road works and construction sites, civil protection, rentals. The range is very diversified, you can find solutions for any use and with different technical characteristics to satisfy the customer and equipped with all the options you need to work easily, safely and quickly.

The main objective for the company is the satisfaction of the various needs of end users through an offer of high quality and reliable Lighting Towers.

Italtower has always been investing in R&D (Research & Development) to offer innovative products, technologically advanced and affordable for everyone. With a great experience behind.

Italtower is a company that always knows how to innovate: the numerous certifications of the Light Towers production prove it.

With SAWARY you will be able to get a diverse range perfectly matches the Made in Italy philosophy: all the products are manufactured in their factories with components from leading Italian and European brands. The quality of the products is proven by CE, CSA/UL, EAC, SASO certifications.

Product innovation passes through the use of technologies and materials that guarantees reliability and durability. These products are constantly improved, always keeping up to date with the latest technologies and market trends. Every detail is scrupulously researched to obtain a unique product of its kind, which includes technological know-how, reliability, and simplicity of use, safety and originality.

The design of these Lighting Towers models adapts perfectly to any type of application, taking care to maintain the product's functionality and strengths.

We provide Lighting tower for all your needs.

AFTERMARKET FILTRATION

- Air
- Lube
- Fuel
- Hydraulic
- Coolant
- All Products
- Channel Flow®
- Fuel/Water Separators
- High Velocity Dual-Flow®
- Pure-Force®

BALDWIN's team of engineers continually looks for ways to improve our product. Working from the basic filtration design and using the latest technology like 3-D CAD modelling and stereo lithographic prototyping, the engineering group leads the way with innovative, patented designs such as Radial Seal air filters, self-venting drain valves for fuel/water separators.

For franchised products such as MTU, we use/market Original Equipment Manufacturer's filters/ products

RACOR is a global leader in engine filtration technology. For almost 50 years Racor have been a driving force of innovation, with a commitment to delivering the best solutions for our customers. Working in partnership with world-class automotive OEMs.

Part of the line offering is the design and manufacture of first-fit equipment for many of the biggest names in truck and bus. And the identical engine filtration is available in the aftermarket, offering you products with exactly the same fit, form and class-leading performance as the original – and always 100% compliant with vehicle manufacturers' warranty conditions.

INDUSTRIAL FILTRATION-AVIATION

The Aerospace Filtration Division (AFD) of Parker Hannifin manufactures a wide range of best in class Parker Velcon filtration and separation solutions and fuel condition monitoring products for use in assuring clean dry aviation fuel.

As the global leader in bulk aviation fuel filtration, Parker AFD proprietary products range from micron-ic filters, fiberglass coalescers, separators, water absorbent cartridges, and clay canisters designed to meet required industry standards.

This includes a complete line of cartridges qualified to the latest editions of EI specifications: EI 1581, EI 1583, EI 1590 as well as housings that meet best in class EI 1596 requirements.

For military fuel handling and filtration, Parker AFD has developed & supplied coalescers & separator cartridges for vessels qualified to stringent military fuel filtration specifications, specifically EI1581 and qualification procedures for aviation jet fuel filter/separators, Category M and M100

Parker CLEANDiesel filtration solutions designed for ultra clean fuel required by today's Tier 4F and Stage IV high pressure common rail engines. Applications includes Mining.

INDUSTRIAL FILTRATION-PROCESS

For over 80 years the PECO brand of products has led the way in oil & gas filtration solutions. Customers trust the PECO brand for quality and performance to handle complex contaminant management issues. Total cost of filtration is not just about how much a filter costs, but rather how much overall cost of maintenance it can reduce. Adding PECO filtration vessels and cartridges to your process will diminish contaminant build-up in process equipment, protect critical equipment from damage, help minimize downtime, lower energy consumption, and keep gas and liquid streams within specs.

PROVIDING SOLUTIONS FOR THE OIL & GAS INDUSTRY

INDUSTRIAL FILTRATION-PROCESS

Parker Domnick hunter, Process Division manufacture stainless and carbon steel pressure vessels and filtration systems that are designed to meet International industry standards and specific customer application requirements.

Our experience and expertise has seen us design and fabricate major systems for industries including:

- Pharmaceutical
- Chemical
- Food and beverage
- Industrial fermentation

Parker Domnick hunter, Process Division manufacture a range of microfiltration cartridges for liquid and gas applications that utilize the latest production techniques, combining the most suitable membranes and filtration media with the latest easy to use formats.

Parker Condition Monitoring specializes in providing online and on-site solutions for monitoring critical plant and industry machinery. Our sensors and equipment pieces facilitate rapid and informed decision-making which helps to keep your machinery running efficiently for longer.

As condition monitoring system specialists, we only supply methodologies that target the earliest stages of fault detection. This ensures that you get reliable and timely results on the critical condition of your plant and equipment. Learn more about our products for Used Oil Analysis, Bunker Fuel Testing, Wear Metals and Fluid Cleanliness. Parker Kittiwake condition monitoring products have been used by the Marine, rail, aviation, Oil & Gas, Power Generation, Mining industry for over 25 years. Fleet-wide condition monitoring helps reduce maintenance cost, increase machinery life, reduce wear and ultimately improve our clients' profits by reducing operational costs.

INDUSTRIAL FILTRATION-PROCESS

Twin Filter B.V. was founded 1985 as a Dutch company, specializing in design, engineering and production of filtration systems for a broad spectrum of industries, at home and abroad.

As of the 1st of November 2012, Twin Filter became part of Parker Hannifin Corporation. Parker Hannifin has a strong strategic focus on the oil & gas industry and through the addition of Twin Filter becomes a global leader. However, Parker Hannifin also is of great value for expanding the Twin Filter process and food & beverage markets.

- Self-cleaning filter units for water applications
- Drinking water filtration systems
- Oil & Gas Drilling filtration systems
- Water intake systems
- Pre-filtration for desalination plants
- Oil and water separation

INDUSTRIAL FILTRATION-PROCESS

For more than 50 years, Purolator, a Parker Brand, has designed and manufactured a broad range of porous, sintered, metallic filter products to address specific needs for diverse markets.

Parker offers superior metallic filtration products that provide precise control of permeability, strength, and corrosion resistance for your applications.

A host of custom and standard products are available for liquid and gas filtration, fluidization, separation, and many other applications.

Product offerings include:

Cleanable stainless steel elements

Self-cleaning filters

Fluidizing media

Filter Septa tubes

High temperature gas filters.

These fabricated metal products are used in chemical processing, power generation, pharmaceutical, refining and other industrial application

COSTEX TRACTOR PARTS CTP®

Costex Tractor Parts CTP® is a worldwide quality supplier of New Replacement Caterpillar® Parts and Replacement Komatsu® Parts, equipment and engines. CTP, offer Premium heavy equipment parts CTP, focus to provide you with great quality replacement Caterpillar® parts at a great value. Our new replacement parts undergo strenuous and strict inspection procedures to ensure the quality of our product. Whether you are mining copper at high altitudes in the Chilean Andes, or digging an irrigation canal on the family farm, you can rest.

Assured that our team and quality parts will back you every step of the way.

From Bearing, Piston, Crankshaft, Fuel Injector, Liner Kits, Valves, GET - Ground Engaging Tools, Gasket Kits,

To Overhaul Kit and all CTP product, we are offering a wide range of High Quality Aftermarket Replacement parts.

INDUSTRIAL PROCESS HEATING

Thermon is a global leader in process heating. They did this by becoming a reliable partner for their customers. No matter where they are in the world, companies know they can always count on them to provide custom-engineered and comprehensive solutions for all their heating needs.

Thermon began in 1954, and they introduced the world to heat transfer cement.

Since then, Thermon has been at the forefront of innovation and invention in industrial heating. From creating the first packaged tracing systems, to the development of high performance heating technology, Thermon has provided customers with the best solutions for their heating needs.

CONCRETE EQUIPMENT

We provide multiple size Truck-Mounted Concrete Pumps

We are Exclusive Partners with the #1 Concrete Pumps Provider in Korea – KCP

Concrete Pump is a large concrete conveying equipment that is mounted on top of a carrying truck. This pump requires steel or flex concrete placing hoses to be manually attached to the outlet of the machine. Hoses are linked together and lead to wherever the concrete needs placing. Line pumps pump concrete at lower volume than boom pump and are used for smaller volume concrete placing apps. Our main focus in the time being is on Boom Pumps only. There is/will be potential for Placing Booms especially in high-rise and mega construction projects, which we would be pursuing gradually

OIL & LUBRICANTS

Shell is the number one global lubricant supplier, delivering market-leading lubricants

Shell Lubricants brings world-class technological insights to its products, offering the best formulations for multi-purpose use to customers in over 100 countries.

We offer through our Partner Shell a large variety of Industrial Lubricants serving and catering to the needs of multiple Business Sectors:

- Power - Cement -Mining
- Petrochemicals -Oil & Gas
- Manufacturing

THE RENTAL COMPANY

The Rental Company -by SAWARY - is aiming to become a leading Saudi rental solutions provider. We aspire to provide our customers with complete rental solutions, through our branch network in KSA. We are your one-stop-shop partner offering detailed solutions, flexible (short or long-term) arrangements, and best-in-class internationally renowned brands. All of this while maintaining the highest international standards of Quality, Health, and Safety. We serve a wide variety of industries including, oil & gas, construction, events, retail & commercial, manufacturing and marine & ports.

WE ARE YOUR STRATEGIC PARTNER OFFERING
ECEPTIONAL SERVICE, WORLD CLAS BRANDS,
LOCAL KNOWLEDGE AND TECHNICAL EXCELLENCE

Sawary has invested in a new range of high quality generators and tower lights to enable us to serve more customers in various industries, but more specifically in Saudi Arabia's booming Events Industry. Our equipment is designed to meet the rigorous standards of the entertainment industry and stand out for their quality, appearance and durability. We are constantly adding innovative and state of the art new equipment that meet (and exceed) customers' requirements. Through our network of reliable partners, we are able to complement our fleet with high quality products that we assess rigorously and monitor closely. This will insure that our customers get the best quality complete solutions, thus eliminate the need to talk to multiple suppliers. With that in mind, Sawary is perfectly placed to provide essential support to a wide range of events, from concerts and sports tournaments to festivals and roadshows. All of this is offered with our renowned highest standards of efficiency and technical support 24/7. The customer is at the heart of everything we do at Sawary, with the company's people-centric work ethic driving success at all levels of the organization.
